New varieties 2027

Miglo Red

Miglo Red stands out with its large, dark red blooms and strong mound growth habit, creating an impressive and uniform presentation at retail level. Flowering in week 38
in the North and week 39 in the South, this variety fits perfectly alongside the Padre family. Its rich color intensity and balanced plant structure make Miglo Red an excellent choice for growers looking for both visual impact and reliable performance throughout the season.

Numi Pink

Numi Pink flowers in week 37 and produces large, deep pink blooms that combine elegance with outstanding garden performance. Flowering alongside the Fonti family, this variety is known for its excellent color retention and long shelf life, ensuring a fresh and vibrant appearance from grower to consumer. Thanks to its strong presentation and reliable flowering timing, Numi Pink is a valuable addition to any premium assortment.
